

MEASUREMENT TEMPLATE FOR INSIDE RECESS WINDOW FITTING

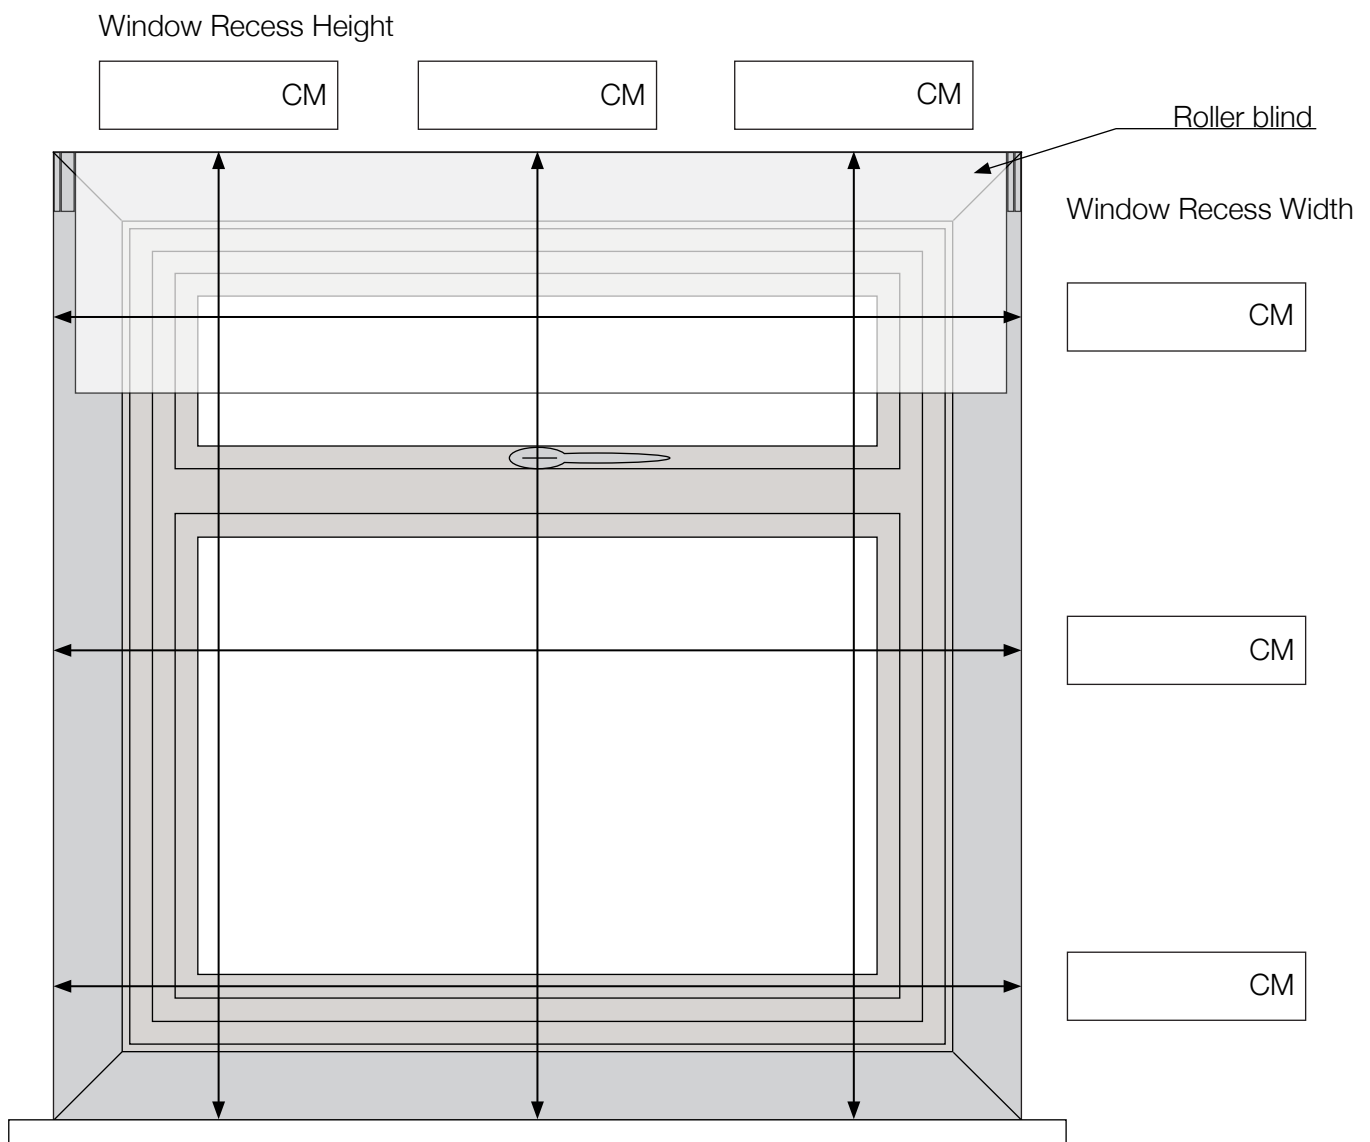

Fitting a Motorised Roller Blind *inside* the window recess

This template is to help you record the measurements for your motorised Roller blind when fitting within the window recess. Please download the '**Outside Recess Window Fitting**' template if you plan to fit your motorised Roller blind to the outside of the window.

Using a metal tape measure, measure the distances as illustrated in the diagram below and make a note of the measurement in the boxes provided. Make sure that you take into consideration any window fixtures such as handles or locks or any other obstruction when measuring for your blind.

Open & Closed Cassette Systems

We will deduct **10mm** from your width measurement when ordering a cassette system to be fitted inside the window recess. This is to ensure the cassette profile fits comfortably within the window recess area (there will be a 5mm gap at either side of the cassette profile when fitted).

Record all measurements in CM and use the shortest of the three measurements when ordering your motorised Roller blind.
