

## MEASUREMENT TEMPLATE FOR OUTSIDE RECESS WINDOW FITTING

Fitting a Motorised Roman Blind **outside** the window recess.

This template is to help you record the measurements for your motorised Roman blind when fitting outside the window recess. Please download the '**Inside Recess Window Fitting**' template if you plan to fit your motorised Roman blind inside the window recess.

Using a metal tape measure, measure the distances as illustrated in the diagram below and make a note of the measurement in the boxes provided. Make sure that you take into consideration any window fixtures such as handles or locks or any other obstruction when measuring.

**N.B. When recording the measurement for the blind width, please be sure to take into account the amount of clearance required at either side of the window recess. Your powered roman blind will be fabricated to the exact width measurement provided.**
