

POWERED ROMAN BLIND MEASUREMENT TEMPLATE FOR **OUTSIDE WINDOW FITTING**

Fitting a Powered Roman Blind **outside** the window recess.

This template is to help you record the measurements for your powered roman blind when fitting outside the window recess. Please download the '**Recess Window Fitting**' template if you plan to fit your powered blind into the window recess.

Using a metal tape measure, measure the distances as illustrated in the diagram below and make a note of the measurement in the boxes provided. Make sure that you take into consideration any window fixtures such as handles or locks or any other obstruction when measuring for your powered blind.

N.B. When recording the measurement for the blind width, please be sure to take into account the amount of clearance required at either side of the window recess. Your powered roman blind will be fabricated to the exact width measurement provided.
