

POWERED ROMAN BLIND MEASUREMENT TEMPLATE FOR RECESS WINDOW FITTING

Fitting a Powered Roman Blind *inside* the window recess

This template is to help you record the measurements for your powered roman blind when fitting into the window recess. Please download the '**Outside Window Fitting**' template if you plan to fit your powered blind to the outside of the window.

Using a metal tape measure, measure the distances as illustrated in the diagram below and make a note of the measurement in the boxes provided. Make sure that you take into consideration any window fixtures such as handles or locks or any other obstruction when measuring for your powered blind.

Record all measurements in CM and use the shortest of the three measurements when ordering your powered roman blind.
