

**MEASUREMENT TEMPLATE FOR WOOD VENETIAN BLIND – EXACT FITTING**

This template is to help you record the measurements for your motorised Wood Venetian blind when fitting outside the window recess or require a blind supplied at the exact sizes you order. Please download the 'Recess Fitting' template if you plan to fit your motorised Wood Venetian blind within the window recess with the reductions made for you by us.

Using a metal tape measure, measure the distances as illustrated in the diagram below and make a note of the measurement in the boxes provided. Make sure that you take into consideration any window fixtures such as handles or locks or any other obstruction when measuring for your blind.

**WHEN ORDERING AN EXACT FITTING WOOD VENETIAN BLIND**, the width & height ordered will be the exact maximum overall sizes of the finished blind, including brackets, rails etc.

Measure the width you require the blind to cover, allowing for the overlap past the window recess on each side. We recommend that you measure a minimum of 5cm overlap on each side (increase the overlap measurement if you want to improve the light filtering at each side of the blind).
